PROFESSIONAL SUMMARY

Cloud and AI engineer with 3+ years of experience building cloud-native, scalable data and machine learning solutions on AWS and Azure. Proven ability to design and deploy agentic AI workloads, LLM-based context engineering pipelines, and big data architectures. Hands-on expertise in Python, DevOps tooling (Kubernetes, Docker, CI/CD), and cloud infrastructure across AWS, Azure, and OpenShift Container Platform (OCP). Strong communicator with cross-functional collaboration experience in fast-paced enterprise environments.

SKILLS

Cloud Platforms: AWS (EC2, ECS, Lambda, S3, VPC, IAM, CloudWatch, Cost Explorer) | Azure | GCP | OpenShift Container Platform (OCP)

Big Data & AI/ML: LLM Integration | Agentic AI | Context Engineering | MCP Servers | Apache Airflow | Elasticsearch | PyTorch | GenAI

DevOps & Infrastructure: Terraform | Docker | Kubernetes | CI/CD | Bash | Infrastructure as Code

Programming Languages: Python | JavaScript | Golang | Bash | C | C++

Data & Databases: MySQL | PostgreSQL | MongoDB | Redis | Oracle | AWS QuickSight | Data Pipelines

Ticketing & ITSM: ServiceNow | Salesforce | Zendesk | Zoho

Certifications: AWS Certified Solutions Architect | AWS Certified Cloud Practitioner | AWS Certified AI Practitioner | CCNA

EXPERIENCE

Technical Solutions Engineer | Concentrix | Canada — **September 2024 – Present**

- Built and deployed agentic AI workloads and LLM-based context engineering pipelines to automate enterprise support workflows, reducing manual intervention and accelerating incident resolution across 300+ users.
- Designed scalable, secure cloud solutions on AWS and Azure, including compute, storage, networking, and security components; maintained 95%+ first-contact resolution through intelligent triage and ML-assisted routing.
- Collaborated with cross-functional engineering, data, and operations teams to gather AI and data requirements, providing technical recommendations and implementing solutions aligned with business objectives.
- Developed and optimized big data analytics workflows to surface actionable insights from high-volume incident queues; implemented ITSM-driven frameworks using ServiceNow and Salesforce, reducing MTTR by 20%.
- Participated in troubleshooting and resolution of complex cloud infrastructure issues (P1/P2), leveraging root cause analysis and detailed documentation to strengthen service reliability in production environments.
- Created knowledge base articles and conducted technical training programs to upskill teams on cloud operations, agentic AI tools, and data-driven support methodologies.

Staff Platform Engineer | Drive-Sec Technologies | India — **August 2021 – November 2022**

- Designed and implemented scalable, secure cloud infrastructure on AWS and Azure, including custom VPC architecture, hybrid network integration via NAT gateways, routing tables, and IPsec VPN tunnels.
- Built and maintained large-scale data pipelines on AWS to support analytics and machine learning workloads, leveraging services such as Lambda, S3, and CloudWatch for automated ingestion, transformation, and monitoring.
- Deployed and configured agentic AI and LLM-integrated microservices on containerized platforms using Docker and Kubernetes (OCP), enabling reliable and scalable AI workload execution.
- Collaborated with cloud architects and data scientists to translate AI and big data requirements into production-ready infrastructure, providing technical recommendations on storage, compute, and security.
- Investigated and resolved connectivity, DNS, and latency issues across on-prem and cloud systems; contributed to incident response workflows, disaster recovery procedures, and infrastructure documentation.
- Supported CI/CD pipeline configuration and DevOps tooling integration to streamline deployments and improve release velocity across cloud-native services.

PROJECTS

Agentic AI Context Engineering Pipeline (Python, LLM, AWS Lambda, S3, MCP)

- Designed and implemented an agentic AI pipeline leveraging LLM-based context engineering to automate multi-step support workflows. Integrated MCP servers for tool orchestration, enabling autonomous decision-making and significantly reducing manual resolution time for recurring incidents.

Big Data Analytics & Cloud Monitoring Automation (EC2, CloudWatch, SNS, Python, Terraform)

- Automated EC2 health checks and built a big data monitoring framework using Python, CloudWatch, and SNS alerts. Provisioned infrastructure with Terraform; improved issue detection speed and reduced manual operational overhead across distributed cloud environments.

Cloud Cost Optimization Dashboard (AWS Cost Explorer, QuickSight, Lambda)

- Built an automated FinOps analytics pipeline analyzing AWS usage data using Lambda and QuickSight, reducing monthly cloud spend by 22% and improving resource utilization visibility for large-scale workloads.

EDUCATION

Post Graduate Certificate in IT Network Security | Canada | GPA: 3.56 — May 2024

Post Graduate Certificate in Wireless Network Infrastructure | Canada | GPA: 3.22 — August 2023

Bachelor of Engineering in Electronics and Telecom | India | 7.59/10 — July 2021
